"1. Study Title : ""Journey into SPACE: Evidence-based Design of an App to Reduce Digital Addiction""
Rater 1 Rating = 3 (Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader societal and policy implications that, while relevant, are not the main focus of the REF-submitted research project.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI version discusses the potential global application and ethical concerns related to user autonomy that align well with the app's core objective
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI includes some potential relevance to global mental health and DA advocacy through regulatory recommendations, which could enhance SPACE's relevance within DA policy discussions, though not specifically detailed in the REF.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI discussed potential for community workshops to adapt the app for public health, emphasizing broad relevance for community wellness in settings beyond individual users, which aligns with but extends the initial aims.

"
"2. Study Title : Using Macroprudential Policies to Reduce the Risk of Financial Crises
Rater 1 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1. The AI version expands the scope of relevance by suggesting how these models could influence broader economic policies and frameworks in sectors beyond finance, potentially influencing trade and investment systems.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI emphasized the global scalability of financial tools and the potential for widespread adoption of systemic risk models across different financial sectors, beyond just banking .
Rater 3 Rating = 4: Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Generalized relevance to emerging global financial issues, including adaptability in financial policy frameworks and surveillance.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Generalization on the international scope of macroprudential models, such as broader integration possibilities with other financial institutions worldwide.

"
"3. Study Title : Utilising the human-canine relationship to support vulnerable people in the criminal justice system
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version speculated on potential long-term global impacts and suggested possible future applications of therapy dogs in non-judicial settings, like education and healthcare, which were not part of the REF-submitted research impacts.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version expands on the relevance of the findings to other high-stress environments, emphasizing the potential to scale beyond the justice system, which adds relevance to healthcare and social services.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Suggestion of additional applications of therapy dogs beyond the justice system in various mental health and social support roles, expanding on the foundational theme of vulnerability support.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated impact narrative suggests potential extensions of the facility dog program to new high-stress environments, adding relevance for future impact avenues that, while aligned with the study's original goals, extend its scope into broader societal implications.

"
"4. Study Title : Embedding responsible practices into business by taking inspiration from the

Quakers
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
broadened the relevance by mentioning how the governance model could be applied in different
sectors and organizations beyond those mentioned in the REF submission, emphasizing scalability
and adaptability across global industries.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT-generated
version provided a broader outlook on how these practices could be adapted across various
industries and governance models, offering an expanded interpretation of relevance beyond the
immediate scope.
Rater 3 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Discussion on QBM's
broader applicability for creating standardized governance models in multinational contexts,
particularly focusing on its relevance for adapting leadership approaches in diverse
organizational and cultural settings.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI's content
explores the application of QBM principles in evolving digital and cross-border leadership
settings, which could enhance its relevance in modern corporate contexts.

"
"5. Study Title : Hope 4 The Community CIC: Improving Lives of People Living with Long-Term
Health Conditions by providing Self-Management Tools
Rater 1 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
extends the potential relevance by discussing future applicability to other diseases, such as
diabetes and arthritis, though this diverges slightly from the original focus .
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: - Broad claims of
relevance in terms of its potential to reduce healthcare costs, without specific cost-benefit
analyses mentioned in the REF.
Rater 3 Rating = 4
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI projections
emphasize global applicability and training frameworks for healthcare systems, suggesting an
international scalability that enhances relevance but goes beyond the specific localized impacts
covered in the REF version.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1) Broad relevance to
chronic disease management and the potential cross-disease application of self-management tools.

"
"6. Study Title : Localisation of Electricity Generation and Use
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT version
extends relevance by anticipating further development of energy technologies, which aligns with
the future goals of the project but isn't explicitly mentioned in the REF submission.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
provides a more expansive view of how the developed technology could impact global markets and
future renewable energy frameworks.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Extension into the
potential impacts on broader economic trends and the possibility of influencing future global
energy policy adjustments, with hypothetical relevance in international contexts.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded focus on
potential relevance in international markets, mentioning adaptability to non-UK regulatory
frameworks, and possible scalability in countries with strong localized energy initiatives.

"
"7. Study Title : Critical Connections pedagogical model based on multilingualism and digital
storytelling boosts language learning and digital skills
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
highlighted the future scalability of the model and considered how the integration of digital

storytelling could transform education beyond the UK, potentially applying to other multilingual societies. This global perspective adds to the relevance but goes beyond the scope of the original case study.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: A broader vision of potential impacts on global educational policy frameworks, not explicitly discussed in the REF submission.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI content broadens the relevance by exploring potential impacts on global education policy and intercultural competency in diverse classroom settings, which, while not central in the REF, aligns with the overarching goals.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated report highlights the potential for policy influence in language education, suggesting multilingual storytelling as a model for multicultural educational systems, which broadens the project's impact scope.

"
"8. Study Title : Helping to Sustain the UK's Independent Film Industry Through an Improved Risk Management Strategy
Rater 1 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content extended the relevance of the research by discussing global implications and the scalability of blockchain and data analytics beyond the UK film industry. This international dimension was not emphasized in the REF version.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version emphasized future technological developments that could offer additional relevance over time, such as blockchain for IP management.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Extensions into broader global relevance, including implications for similar industries outside the UK, and hints at cross-sectoral adaptability in risk management and finance.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT's inclusion of scalability aspects extends the relevance of risk management strategies to international film industries, making the research insights potentially transferable to other high-risk creative sectors.

"
"9. Study Title : Changing practice and improving wellbeing through immersive vocal art
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader relevance to global LGBTQ+ advocacy and artistic innovation through interdisciplinary platforms is more emphasized in the AI-generated version.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Greater emphasis on potential future interdisciplinary expansions, particularly in sensory performance art and gender studies.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1. Potential expansion into broader studies of non-normative vocal identity in interdisciplinary arts and sciences.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT-generated content's inclusion of discussions on potential interdisciplinary adoption reinforced the project's relevance to diverse sectors, such as technology integration in educational and cultural institutions.

"
"10. Study Title : Safewards: Increasing Safety on Psychiatric Inpatient Wards
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content places a stronger emphasis on the global relevance and adaptability of the model, suggesting its potential adoption in broader healthcare systems and predicting its future

applicability to emergency departments and other high-risk settings globally.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version discussed the broader relevance of Safewards to international healthcare settings, suggesting that it could be adapted for different cultural and healthcare environments globally.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded on the international relevance of Safewards, suggesting a broader applicability to healthcare systems beyond the UK, including potential impacts on mental health care policies worldwide.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: None; both versions retain relevance strictly within the core themes of patient safety, ethical care, and mental health improvement.

"
"11. Study Title : Contemporary documentary practices: historical perspective and interdisciplinary approaches – the International Research Centre for Interactive Storytelling (IRIS)
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content highlights the potential for future cross-cultural and global impact, offering an extended view of how interactive documentary models could be applied to other post-conflict zones, which is not fully explored in the REF submission.
Rater 2 Rating = 5 – Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader exploration of the adaptability of the research framework for future interdisciplinary projects, particularly the potential for influencing digital policy and media studies in new contexts.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional emphasis on the transferability of interactive media techniques to broader socio-political contexts globally, underlining the adaptability of these methods for other civic engagement and archiving purposes.
Rater 4 Rating = 4: Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader implications for transnational digital documentation and the potential policy impacts of community-driven archives on global cultural preservation.

"
"12. Study Title : Improving patient outcomes through better project management of clinical trials
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version offers broader contextual relevance by mentioning the potential to improve project management practices in non-pharmaceutical industries, suggesting future adaptability and policy influence across global clinical trials.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version highlighted more forward-looking relevance, including the scalability of the framework in future pharmaceutical innovations and clinical trials.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Exploration of the research's applicability to other industries (e.g., IT, construction), adding contextual relevance for broader project management domains.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Highlights the transferability of the project management framework across multiple industries, underscoring its potential as a widely adaptable tool in project management.

"
"13. Study Title : Ensuring the Fair Treatment of Open Banking Customers
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version offered broader reflections on the relevance of the research to global trends in fintech regulation, which were less prominent in the original REF case study.
Rater 2 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version

explored broader relevance to global financial systems and potential adaptation to other countries' Open Banking frameworks, making it slightly more internationally focused.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI briefly mentions implications for global financial ecosystems and hints at applications in regions with emerging data privacy laws, expanding the relevance to a potentially international context.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded focus on broader impacts and adaptation of dynamic consent models, foreseeing relevance to cross-sector applications.

"
"14. Study Title : Advancing Movement Practices in Doctoral and Professional Contexts
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version discusses potential policy influence through future technological integration and broader global adoption of the PaR methodology.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version extended the relevance by linking the research to global educational frameworks and suggesting ways the CAP method could serve as a model for arts-based PhD programs internationally.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional relevance suggested in therapeutic settings and the possibility of broader interdisciplinary adoption across global educational contexts.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content extends the application of CAP's methodologies to international cultural and arts initiatives, such as UNESCO's Creative Cities, broadening CAP's potential for cross-cultural application.

"
"15. Study Title : Digital Twin Specification, Design and Application
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI content emphasized the global and cross-disciplinary relevance of the LEAP framework and its potential scalability across industries, with a focus on future-proofing and adaptability.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version discusses more abstract possibilities for extending this technology into new fields (like healthcare or global digital infrastructures), making it forward-looking but less specific than the REF.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version emphasizes broader relevance in international policy and regulatory frameworks, extending DT applicability to sectors such as global health, logistics, and potentially in global enterprise standards, which are not covered in the REF.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1. Relevance of digital twin applications for global policy standards, a more generalized theme which the REF submission doesn't cover specifically. 2. The potential for digital twins in enhancing international digital economy benchmarks, emphasizing cross-sector adaptability.

"
"16. Study Title : Being in Touch: Inspiring Cultural Engagement through Creative-Critical Writing
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on the global relevance and scalability of the research, particularly in influencing future creative technologies and cross-disciplinary applications in sensory arts.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT expands relevance by suggesting future policy and technological engagement that could further extend the impact of the research .
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: - Mention of broader

applicability in global cultural and literary programming, potentially extending beyond current institutional partnerships.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broad potential for relevance across cultural engagement methodologies, suggesting potential applications in digital and virtual platforms.

"
"17. Study Title : Shaping crime prevention policy and strategy to sustain the crime drop and reduce domestic burglary
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version gives more emphasis on potential global relevance and the future transferability of findings to different types of crimes and regions.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version provided a stronger emphasis on global scalability and the potential for applying the security hypothesis to emerging crime trends like cybercrime.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applications of the research outcomes, such as implications for global crime prevention strategies and integration into international policy frameworks.
Rater 4 Rating = [5] Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT suggests additional applications in predictive policing and community engagement strategies, potentially expanding the relevance of findings for public awareness and safety enhancement.

"
"18. Study Title : Building local socio-economic impacts into the assessment of major energy projects
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The relevance of the socio-economic monitoring system in ChatGPT's analysis expanded beyond the UK context and suggested broader global applications, potentially impacting large infrastructure projects globally (e.g., wind farms, urban development projects), which was not mentioned in the REF submission.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expansive analysis on the relevance of findings beyond the local context, including international applicability.
Rater 3 Rating = 4: Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Discussion on global relevance and potential for broader application, which extends the relevance beyond the immediate study context.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Extended emphasis on ethical considerations in socio-economic management and relevance to climate resilience goals.

"
"19. Study Title : Strengthening global and national policies on performance-based and innovative health financing in low-income and fragile settings
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT extends the relevance of the PBF model to other sectors and discusses its potential global applications, which is a broader interpretation of the relevance of the research that the REF submission does not cover.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Greater focus on the scalability of PBF and its application to global health systems beyond the immediate research focus.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT extends the relevance to include future application potentials of the PBF model beyond LMICs, emphasizing broad applicability and scalability to other regions facing health financing challenges, even if these were not specific to the research settings originally studied.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Reference to ongoing

global funding structures that could potentially apply PBF models post-2020, emphasizing resilience in healthcare financing.

"
"20. Study Title : Transforming the Accessibility and Discoverability of Millions of Archival Television Programmes
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT offers broader discussions on the application of the research in other fields such as AI-driven analysis of media content, expanding relevance beyond the immediate scope of the REF submission.
Rater 2 Rating = 4: Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: A forward-looking perspective on how the project might influence future research and policy directions beyond the UK, especially as a model for media archival practices globally.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on broader educational applications, such as integration into international media studies curricula and media policy discussions globally.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report suggested international expansion opportunities and partnerships with digital platforms to increase access to archival materials globally, aligning with the research's broader relevance goals.

"
"21. Study Title : Improving quality of life for patients with Parkinson's disease
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT discusses the potential for integrating patient-reported outcomes in a way that emphasizes future improvements in treatment, which was less discussed in the REF version.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader relevance to future health policies beyond Parkinson's disease.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional references to global transferability of clinical recommendations, potential impacts for integrating Parkinson's treatment advancements into international guidelines
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI content additionally included discussions on future PD research directions, particularly in rehabilitation approaches, indicating relevance to evolving project goals.

"
"22. Study Title : Improving Treatment for Women Suffering from Endometrial Hyperplasia
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version discusses the broader relevance of the research to global healthcare systems, mentioning how it could be implemented in various clinical settings, including in low-resource environments, which enhances the relevance to a wider audience.
Rater 2 Rating = [Rating: 5]
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The focus on global transferability and adaptability in other healthcare systems.
Rater 3 Rating = 4
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader societal benefits, including enhanced healthcare access for low-resource settings and reduced healthcare expenditure due to fewer surgeries.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader emphasis on healthcare resource sustainability and cost savings in varied clinical contexts, which could enhance the project's relevance on a global scale.

"
"23. Study Title : Heritage of the first farmers
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version focuses more on the potential for expanding the project's educational and cultural

influence internationally, predicting global impacts that were not fully explored in the REF submission.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Discussions of global sustainability and resource management implications, which are highly relevant to the broader context of archaeological studies but less emphasized in the original submission.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT's version suggests that impacts could be extended to additional archaeological sites globally, potentially enhancing relevance for international archaeology and heritage policies.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader references to the potential influence on regional tourism and international archaeological discourse.

"
"24. Study Title : Mathematical modelling of an aneurysm sealing system triggers patient safety policy that withdraws surgical practice from the NHS
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Exploration of future regulatory policies and potential technological innovations stemming from the research findings, beyond the immediate patient safety and policy impacts.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader discussions of the future applicability of the mathematical models beyond the specific case of Nellix.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Possible future applications of the modeling technique to other stent or device types and cross-disciplinary impacts in biomechanics and healthcare policy development.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: General alignment to NHS safety policy impacts without specific references to individual hospital adjustments.

"
"25. Study Title : Financial and efficiency improvements from socio-technical digitalization of costing and procurement in the built environment
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader potential for scalability to other industries like healthcare and global relevance, which extends the research's focus beyond construction-specific impacts.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI-generated content discussed broader potential impacts on global digital transformation in construction, suggesting future international collaborations and extending beyond UK-specific examples.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded considerations for future cross-disciplinary applications, such as potential technological integrations in non-construction sectors and educational implications beyond the construction management field.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Speculative mentions of digitalization's influence on international construction trends, suggesting applications in multinational projects or in overseas supply chains.

"
"26. Study Title : Evaluating Effectiveness
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version extends relevance beyond policy into potential applications in legal and social justice frameworks, suggesting broader applicability across different societal domains.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version included additional discussions on the broader applicability of Cartwright's theories, including potential future reforms in healthcare evaluation and international policy frameworks, which were not part of the REF submission.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional emphasis

was placed on global relevance and the ability of Cartwright's approach to influence emerging domains in healthcare and policy, promoting ethical considerations in evidence evaluation.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded scope suggesting potential applications in international legal standards and more generalized influence on methodological practices across global healthcare settings.

"
"27. Study Title : Seeing beyond the wheelchair: Pioneering education and higher aspiration promotion for boys and men with Duchenne Muscular Dystrophy
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader global relevance and potential for international scalability.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version includes wider, speculative impacts on other sectors (e.g., healthcare policy reform, broad educational advancements) that were not covered in the REF submission but remain highly relevant.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applicability to other neurodevelopmental and chronic conditions, which underscores the relevance of this research for a wider population.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: N/A

"
"28. Study Title : The Coffee Historian: Achieving Impact Through Industry Collaboration, Education, and Public Engagement
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version expands on the relevance of the research to future technological advancements in espresso machine production and the broader global coffee industry.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT adds some additional relevance by connecting the research to global sustainability conversations and future technological impacts, which were implied but not as prominently explored in the REF case.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on the cross-disciplinary potential of the research to influence policies on sustainable coffee production and consumption worldwide.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on global adaptability of coffee culture and cross-disciplinary relevance to social and economic domains.

"
"29. Study Title : Discovering Ted Hughes's Yorkshire
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version emphasizes interdisciplinary applications and theoretical impacts, particularly in mental health and ecological studies, which the REF submission does not explore.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader policy implications and future trends in technology are discussed in the AI version but are not directly tied to the Ted Hughes project.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Suggestions for expanding cultural engagement through digital platforms and proposals for broader policy advocacy on cultural heritage preservation.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: N/A

"
"30. Study Title : Empowering Indigenous Self-Representation for the Emberá People of Panama
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Focus on the potential for cross-disciplinary collaboration and global policy relevance, which could extend beyond the Panama context.

Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
report broadened the relevance of the study by suggesting it could influence global frameworks
on cultural tourism and indigenous autonomy, which was not part of the original REF submission.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
version extends relevance by discussing how this research might influence Indigenous tourism
policies globally, connecting the study's findings to a broader framework of ethical tourism and
Indigenous rights.
Rater 4 Rating = [5] Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Relevance of
indigenous tourism models in political and social frameworks beyond the Emberá community,
potentially benefitting wider Latin American contexts.

"

"31. Study Title : Enhancing Understanding of the Foreign and Security Policy Implications of
Brexit for Government and the Wider Policy Community
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT includes
broader global relevance, with a focus on how the UK's post-Brexit strategies could influence
other non-EU nations negotiating trade and security deals with the EU.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
mentions more potential impacts on economic and trade policy at a global level, which were not
explicitly addressed in the REF submission but are relevant extensions of the research.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT's broader
look at potential influences on non-member EU relations, while relevant, could be considered as
an extended relevance dimension beyond the specific REF context.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader implications
for global defense partnerships and adaptability within rapidly shifting geopolitical landscapes.

"

"32. Study Title : Worldwide Improvements in Policing due to Increased Sales of Facial Composite
Software
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
expands on the potential future relevance of the technology in fields beyond law enforcement,
like entertainment and plastic surgery, demonstrating a broader applicability that was not
directly addressed in the REF submission.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
content suggests broader, long-term applications in other sectors, which increases its overall
relevance to a wider array of fields beyond law enforcement.
Rater 3 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Future relevance in
forensic policy changes and AI-driven global facial recognition standards.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI-generated impacts
incorporate potential applications in non-criminal fields, adding contextual relevance beyond
policing.

"

"33. Study Title : Improving the Physical Wellbeing of the Police Force
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
highlights scalability and transferability to other police forces more strongly, presenting a
broader, future-oriented application than is fully explored in the REF version.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expansion of the
program's relevance to other occupational health contexts.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded
applicability to other public sector wellbeing initiatives, indicating potential
cross-disciplinary relevance for similar occupational health programs.

Rater 4 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI discusses the
relevance of peer-based health mentorship models in varied professional settings beyond law
enforcement, introducing ideas for adapting similar wellness frameworks in other high-stress
professions.

"
"34. Study Title : Raising Maori students' achievement in secondary schools in Aotearoa New
Zealand
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI content
expands on the global transferability of the pedagogical framework and how these teaching
methods could be used in other underserved or diverse educational settings.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
version extends the relevance to global educational systems, discussing broader applications of
culturally responsive pedagogies beyond the Māori context and offering insights into how these
models might impact literacy rates in other underserved populations globally.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT elaborated on
the potential for integrating these insights into technology-enhanced learning solutions and
global educational models, which aligns with broader relevance but was less emphasized in the
original REF submission.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
extended the application of culturally responsive frameworks to other educational systems
globally, suggesting a broader relevance beyond New Zealand, which was less directly stated in
the REF version.

"
"35. Study Title : Improving patient outcomes and treatment guidelines through the study of
Hepatitis C
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT provides a
more speculative outlook on future trends in public health policy and healthcare technology
integration.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
version provides a wider perspective on global relevance, which extends the focus to
international policies and broader healthcare systems.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
suggests potential relevance in developing global guidelines and policies, which could apply to
other healthcare systems. This expands the relevance beyond the UK-specific impacts noted in the
REF submission.
Rater 4 Rating = 4 - Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader application
of findings to other international HCV-related public health frameworks without explicit
alignment to UK-specific metrics.

"
"36. Study Title : Improving Homecare Quality in the UK Through Optimized Workforce Planning
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
discusses broader, cross-disciplinary applications, which adds to the relevance of the research
across multiple industries, something the REF version does not fully explore.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader public health
policy implications.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Anticipated relevance
in policy influence for sectors with scheduling needs, such as logistics and emergency response,
beyond healthcare.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report
extended relevance to broader sectors that could benefit from similar scheduling technologies,

particularly in community healthcare and logistics.

"

"37. Study Title : Transforming vaccine policy for pneumococcal disease leading to significant cost savings in the NHS
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version expands the relevance to a global audience by highlighting how the research findings could impact worldwide vaccine strategies and public health diagnostics, which is less emphasized in the REF submission.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Discussions on broader societal impacts such as public health improvements.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT version introduces a broader, international perspective on surveillance applicability, extending relevance to global vaccine policy frameworks.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded potential for integration with other vaccines and broader healthcare cost analysis applications beyond the NHS.

"

"38. Study Title : UoP32Househistories: A House Through Time: Shaping a flagship TV series to achieve critical and financial success and inspiring the public to engage with house history
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version highlights the global relevance of the research, particularly in how it can inspire international heritage projects and public history initiatives beyond the UK. This broader view of relevance is not as detailed in the REF submission.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version's focus on potential future interdisciplinary collaborations and expanded cultural engagement through media and public events provides a relevant and forward-thinking perspective that is not as emphasized in the REF version.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Reinforces the general theme of public engagement, historic relevance, and the educational impact on cultural history, yet without concrete figures.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version expands relevance by discussing how the program's success might shape similar initiatives on historical topics, suggesting a wider relevance within the media and educational landscapes.

"

"39. Study Title : Optimising baggage operations at London Heathrow Airport to achieve cost savings for the aviation industry
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential relevance to public sector applications such as disaster logistics, public health supply chain optimization, and the scalability of the algorithms to other industries beyond aviation.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader relevance to international airports and logistics beyond the UK, which was implied but not a focus in the REF submission.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report highlighted potential applications of the developed algorithms for real-time adjustment in other logistical systems, which could increase the project's relevance beyond Heathrow.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report highlighted potential applications for these dynamic optimisation methods in logistics and manufacturing, broadening the perceived relevance beyond Heathrow but potentially diluting its immediate specificity.

"

"40. Study Title : POWeR – Cost-effective online support for weight management
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT's focus on
digital health innovations and potential global applications added a broader lens to the
relevance of the project.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
content suggested additional relevance for future health systems, especially concerning global
health challenges such as diabetes prevention and international health care models, which were
not the primary focus in the REF submission but are nonetheless highly relevant.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential future
relevance in global health settings and transferability to digital health models outside the UK,
such as partnerships with international healthcare providers.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader digital
intervention relevance and opportunities in chronic disease prevention and management across
diverse healthcare settings.

"

"41. Study Title : The global impact of Sunderland's football research on scouting, training,
and player preparation in elite football
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The broader relevance
to other high-intensity sports and the technological advancements suggested, such as wearable
tech for injury monitoring, which could influence the sports tech industry globally.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
version highlights broader societal impacts, such as its potential to inform public health
campaigns on athlete mental health and injury prevention.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expansion on
tech-driven, real-time performance monitoring as a relevance point was noted only in the AI
version, enhancing the future applicability of Sunderland's research.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Suggested relevance
of findings to non-sport contexts like physical education curriculum development for schools and
public health awareness campaigns on sports injuries.

"

"42. Study Title : Adding value to convenience retailing through improved pricing, a new store
concept, and capacity building
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report adds
relevance by considering how these findings could be applied to other service domains,
emphasizing the transferability of consumer behavior models across industries.
Rater 2 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1. The AI-generated
content touched upon environmental impacts, such as reducing food waste in convenience stores,
which was not mentioned in the REF submission.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
highlighted the adaptability of the convenience model to other sectors, adding value to its
relevance in a broader retail and service context beyond just convenience stores.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT suggests the
scalability of findings for broader retail adaptations, enhancing potential industry relevance.

"

"43. Study Title : Transforming Evidence-Based Practice in Public Health Through Co-Production
and Evaluation
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: - Stronger emphasis
on the scalability and global transferability of the co-production model, particularly in terms
of low-resource settings, was more pronounced in the ChatGPT version.
Rater 2 Rating = 5 (Excellent)

RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content emphasizes the global and transferable nature of the co-production model, suggesting broader implications for public health and education policy on a wider scale. This element of scalability and transferability is more developed in the AI version.
Rater 3 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded relevance across sectors, highlighting areas like education and criminal justice where similar models may apply. This additional relevance is suggested for potential applications rather than confirmed outcomes.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version suggests additional relevance for policy makers at a national level, detailing the co-production model's potential to streamline collaborative approaches across various regions and institutional settings.

"
"44. Study Title : Well-being and Public Policy
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Discussion on the long-term integration of well-being frameworks in international organizations like the UN. - Broader focus on educational implications and the impact of well-being metrics on curriculum design.
Rater 2 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated report expands relevance by proposing the potential application of well-being research to broader international and social contexts, such as its impact on global health strategies or well-being-driven economic frameworks. This adds a layer of relevance for global policy development but moves away from the specific UK-centric achievements documented in the REF.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on long-term sustainability and ethical considerations in adapting well-being frameworks globally.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded applicability of well-being models in international policy frameworks, positioning the research as a global model for well-being integration into public policy.

"
"45. Study Title : Improving the quality of green infrastructure in towns and cities in the UK
Rater 1 Rating = 4 - Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Discussion on global climate resilience and the adaptability of the research to international urban planning challenges.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version introduced broader potential future impacts, especially in terms of scalability and public health, which were not explicitly addressed in the original submission.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT introduces the idea of a global relevance dimension, suggesting potential for broader, international impact, which, although relevant, goes beyond the focus of the REF submission.
Rater 4 Rating = 4: Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applications in international contexts, with future impact on urban policy in similar settings worldwide.

"
"46. Study Title : Redressing the state of the stateless: seeking political recognition for Tibet and Kashmir
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version expands on the broader implications for future cultural and academic trends, potentially influencing global discourses on statelessness and postcolonial identity beyond what the REF submission explicitly focused on.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content emphasizes the theoretical frameworks and their cross-disciplinary relevance, which could be applied to other geopolitical contexts beyond Tibet and Kashmir.

Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version included additional relevance for academia, offering broader postcolonial context and cultural understanding applications that extend the relevance scope.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI-generated impacts touched on relevance to global awareness but missed nuanced political actions tied to the researchers' advocacy efforts.

"
"47. Study Title : Evidence-based enteral feeding practices for very preterm or very low birth weight infants
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report discusses broader scalability and potential for influencing global neonatal policies, as well as long-term cost savings in healthcare, which were less developed in the REF submission.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT's version mentions a broader potential for influencing global health policies, particularly in under-resourced healthcare systems, which is an important addition to the impact narrative.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Highlights relevance for cross-cultural health protocols, collaborative adaptation in NICUs worldwide, and research's role in future NICU policy frameworks.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential for broader NICU application and cultural adaptability in training and milk bank protocols.

"
"48. Study Title : Improving Environmental Conservation in East Africa and Beyond
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT expands the relevance of the research to global audiences and potential technological innovations, making it applicable to other ecosystems and conservation efforts beyond the original scope of the REF submission.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1. Broader global relevance of conservation methodologies and tools like AFRICLIM, with references to wider ecological and climate change impacts.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional focus on broader scalability and adaptability to other conservation regions, which reinforces the potential global relevance of the project.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Suggested models for community-engaged conservation relevant to potential international adaptation, especially within policy frameworks.

"
"49. Study Title : Predicting the properties of materials with first-principles electronic structure software (CASTEP)
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version emphasizes relevance in emerging fields such as environmental sustainability and scalable computing, which adds a layer of future-oriented relevance.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content discusses the potential cross-disciplinary impact of CASTEP, particularly in fields like environmental science and clean energy, which were not fully explored in the REF submission.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI includes relevance to global research collaborations, expanding CASTEP's influence internationally and across various sustainability-related disciplines, underscoring its adaptability and potential for broader applications.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional potential

applications in advanced fields such as green technology development and sustainable
semiconductor design, expanding on the relevance of CASTEP's capabilities.

"
"50. Study Title : Statistical pattern recognition applied to protein crystallisation images in
the pharmaceutical industry
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The potential
application of the image classification techniques in broader scientific fields like genomics
and structural biology was elaborated more in the AI-generated version than in the REF
submission.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version delves
into broader applications and innovations, considering the relevance of the technology across
multiple industries and predicting broader adoption in scientific workflows beyond the specific
scope of the REF case.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT version
suggests global applications and scalability beyond the specific companies mentioned in REF,
extending the impact to a wider scientific audience.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expansion of
relevance to cross-disciplinary applications and potential for broader pharmaceutical R&D
efficiencies through automation.

"
"51. Study Title : 'Moving beyond one-size-fits-all: Improving Widening Participation through
Realist Evaluation methodologies in Northern England'
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
emphasizes the potential for WP practices to inform broader educational reforms globally and
highlights a more expansive view of equity and inclusion. (AI version: [9] Global Relevance
section)
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI content
discusses the global transferability of RE methodologies, suggesting relevance not just for
local WP contexts but for broader applications in education reform, which extends the perceived
relevance beyond the immediate project scope.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional focus on
international relevance of WP policies, which extends the research's potential impact globally.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
version included relevant contextual expansions, like discussing WP's potential applicability in
other regions, suggesting broader RE relevance across different UK educational contexts.

"
"52. Study Title : Challenging monolithic conceptualisations of English for learning, teaching
and assessment: The Changing Englishes online course
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
introduces discussions on how the research could also be relevant to industries beyond
education, such as technological innovation in language learning platforms and its long-term
cultural impact.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT extended the
relevance by linking the findings to future policy changes, such as revisions to international
English language proficiency tests, which were not directly addressed in the REF submission.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: General applicability
of plurilithic perspectives across educational frameworks globally, particularly in multilingual
societies.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
effectively captures the global relevance of the plurilithic approach to ELT, noting potential
applications for inclusivity in other academic fields and predicting potential adaptations in

international language assessment standards, an aspect not elaborated on in the REF submission.

"
"53. Study Title : Robert Paul and the Origins of British Cinema
Rater 1 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT emphasizes the potential global relevance of the technological innovations in early cinema and advertising, offering insights into scalability that are less emphasized in the REF submission.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version considers broader technological and commercial applications that extend beyond historical preservation, suggesting future relevance in advertising and film technology commercialization.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version expanded on broader educational impacts, speculating on how Paul's contributions could influence media history teaching and commercial advertising practices, which the REF did not cover directly.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broad relevance to global film preservation standards and increased recognition of British contributions to early film technology.

"
"54. Study Title : The Care and Management of Gout in Primary Care
Rater 1 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader mention of potential impacts on global healthcare policies and adaptability of findings to other chronic diseases.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version suggests a broader global relevance, with discussions on how the findings could inform public health strategies internationally.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1. Use of digital health tools for patient monitoring and adherence, extending impact relevance. 2. Emphasis on international policy adaptations, increasing relevance in global health contexts.
Rater 4 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potentially applicable broader policy suggestions for integrating gout management insights into general chronic care frameworks.

"
"55. Study Title : From Victims to Actors: Shifting the Policy Paradigm to Value Children's Contribution in Disaster Risk Management
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version elaborated on potential future international collaborations and the scaling of disaster management strategies to global contexts, which were not explicitly mentioned in the REF submission.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: A more extensive discussion on potential collaborations with international bodies such as UNICEF and broader, future-oriented policy influence possibilities.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on global adaptability and the relevance of child-inclusive disaster strategies for regions facing climate-related challenges, enhancing relevance across broader geographic and policy contexts.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Generalized relevance to children's rights in global disaster frameworks without focusing on particular, documented policy changes. The AI-generated version emphasizes a broader societal relevance that could extend beyond specific regions.

"
"56. Study Title : Improved Crab Fisheries Management Benefits Coastal Livelihoods in Brazil
Rater 1 Rating = 5 - Excellent

RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT's version discussed the broader implications of the cooperative structure in global fisheries management, which was not emphasized in the REF submission. It also provided a future-oriented look at how the research could influence other sectors, such as environmental sustainability efforts worldwide.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version added more speculative future relevance, particularly regarding how the management tool could influence global fisheries policy, an aspect only lightly touched upon in the REF version.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential relevance to other regions with similar environmental and socio-economic challenges and future global policy implications.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Global relevance of predictive fishery management tools for similar ecosystems.

"
"57. Study Title : Influencing Organisational Strategy to Support Responsible Business Practice
Rater 1 Rating = 4 - Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT provides a more forward-looking analysis, emphasizing the potential for future impacts in policy and business governance at a global scale, which is less prominent in the REF submission.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded application of the OR methodologies to international policy frameworks and governance structures.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content introduced broader international applicability of the research's concepts in responsible business frameworks, highlighting its potential in similar contexts globally.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT mentioned broader implications of the research's approach to corporate responsibility, including potential influence on international standards, not specifically emphasized in the REF document.

"
"58. Study Title : Billmonitor: predicting the best mobile phone contract for businesses and individual users
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: - Broader discussions of the future scalability of the Billmonitor model to other domains and its potential for integration into future financial risk management systems.
Rater 2 Rating = 4 - Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Cross-disciplinary relevance in fields like finance, genomics, and long-term theoretical impact, extending beyond the immediate scope of mobile telecoms.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential for global applicability of the savings model and the broader impact on AI-driven consumer decision-making.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applicability suggestions that may influence future research or potential policy integration within other sectors using predictive analytics.

"
"59. Study Title : Mediating Modern German: reaching new and diverse audiences through translation, engagement, and performance
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version highlights the long-term relevance of the research in shaping future academic discussions and interdisciplinary collaboration, aspects that were less prominent in the REF submission.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated version expands relevance by suggesting broader technological and policy impacts, which are not explicitly discussed in the REF submission.
Rater 3 Rating = 5 (Excellent)

RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: N/A – the AI version remains highly relevant throughout, focusing on the core goals of public engagement and cultural impact as outlined in the REF submission.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader mention of international applicability and the potential for integration with digital learning tools to extend reach.

"
"60. Study Title : OMass Therapeutics: New technology for drug discovery with economic benefit to the UK
Rater 1 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version provides additional context on global healthcare challenges and how the research may influence international drug resistance policies, which is not discussed in detail in the REF submission.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT elaborated on potential global implications of the technology, especially how it might influence international drug discovery efforts in other therapeutic areas.
Rater 3 Rating = 4 - Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version discussed extended impacts in drug discovery beyond OMass's immediate clients, considering broader societal benefits in treatment accessibility and pharmaceutical innovation.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI broadened potential relevance by introducing possible implications for international biotech firms and drug discovery acceleration methods beyond the UK market.

"
"61. Study Title : Living With Feeling: Transforming Understandings of Emotional Health
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: More futuristic application in AI ethics, public service ethics, and global relevance of the research was highlighted in the ChatGPT version, which wasn't deeply explored in the REF submission.
Rater 2 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated impacts included broader relevance, discussing the potential global implications of emotional health education and the scalability of the research beyond the UK context. This global perspective was not emphasized in the REF submission.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader connections to global healthcare impacts, indirectly indicating how historical perspectives on emotions might shape contemporary mental health awareness internationally.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT extends relevance by linking the research's implications for ongoing developments in emotional health curricula, especially relevant for evolving public health frameworks.

"
"62. Study Title : Litigation as a Tool to Support Social Change: Indigenous Peoples, Human Rights, and Legal Empowerment
Rater 1 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content discusses the broader applicability of the research to global advocacy efforts, including educational impacts that the REF submission did not focus on.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT expands on the potential for litigation strategies to be scaled globally and adapted in various international contexts, offering a more global perspective than the original submission.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader potential for litigation strategies to be adopted across various jurisdictions and its influence on international policy frameworks for indigenous rights and sustainable resource management.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT emphasized the transferability of these litigation strategies across various international contexts,

highlighting the broader, global relevance of this legal empowerment approach.

"
"63. Study Title : Accelerating the development of medicines for children through an open-access
excipient database
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: - Emphasis on the
future regulatory landscape and integration of the database in international policymaking.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
content broadens the relevance by discussing the potential for the STEP database to serve as a
model for other drug safety databases and emphasizing its future role in a global regulatory
context.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded relevance in
terms of broader public health implications, potential for international impact in low-resource
settings, and emphasis on ethical practices in excipient research.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Anticipated future
relevance in international pediatric drug policies and broader potential impacts on global
health policy alignment

"
"64. Study Title : Pluralistic Evidence for Successful Policymaking about Reactive Systems
Rater 1 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version
identifies broader relevance in non-healthcare sectors, particularly in IT, commercial data
management, and industry regulations.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
version offers a more global perspective on the relevance of the research, suggesting its
applicability beyond the UK in the context of international healthcare policies and data
governance.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT extends
relevance by adding potential stakeholders beyond the original scope, including international
bodies and digital governance frameworks.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Wider application of
ethical frameworks to varied sectors, including suggestions for regulatory adjustments across
global public health and data governance systems.

"
"65. Study Title : Reshaping professional heritage practice and changing understanding of
heritage in the UK and internationally
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: More emphasis on
future policy and technological advancements, particularly the inclusion of non-human factors in
heritage management.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
offered a forward-looking perspective on the potential future relevance of the research in
policy and international heritage discourse.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
version discussed potential implications for global climate policy in the heritage field,
providing additional context for the relevance of heritage studies in broader environmental and
policy arenas.
Rater 4 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: References to a
general shift in conservation strategy due to emerging cultural and technological challenges,
framed broadly without detailed linkage to sector-specific adjustments.

"
"66. Study Title : Shaping the legal framework for Brexit
Rater 1 Rating = 5 (Excellent)

RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT includes an extended view on global legal impacts and the potential application of the research in international law contexts, which enhances its relevance to broader audiences beyond the immediate UK legal sphere.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content highlights additional future potential relevance, such as applications in broader EU and international legal contexts, giving it a broader relevance that stretches beyond the specificities of the Brexit case.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader context on the future use of Article 50 interpretations, potential effects on international diplomatic relations, and indirect implications for human rights law.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI provided an expanded view on how Brexit rulings might influence judicial independence and constitutional review in global contexts, enhancing the relevance for an international legal audience.

"
"67. Study Title : Bristol's materials research is keeping the UK's fleet of nuclear power stations safe and operating.
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Consideration of global relevance and scalability beyond the nuclear sector.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated content offers additional reflections on the global relevance of the research, noting possible applications in international energy frameworks and future reactor technologies.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded focus on international relevance and adaptability for global nuclear safety standards, emphasizing long-term sustainability across various energy-intensive industries.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Focus on broader applications in global nuclear industry standards and the potential for application in next-generation reactor designs.

"
"68. Study Title : Radical advance in treating age-related macular degeneration leading to global impact in prevention of blindness
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version discusses broader societal impacts, including public health campaigns and future sustainability in healthcare, that are not explored in the REF submission. This includes long-term equity and access to treatments in global health systems, adding to its relevance beyond the immediate findings.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: A broader, more global view of the economic impacts was evident in the ChatGPT version, particularly its potential relevance for future healthcare economic modeling across developing nations.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on potential relevance to global health policies, including healthcare affordability and equitable treatment access, is more pronounced in the AI version.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version adds broader potential applications, foreseeing relevance for other chronic diseases, extending the original scope, which could facilitate wider healthcare adoption across low-income regions.

"
"69. Study Title : Rolling programme of research, centred on the National Joint Registry, to improve the outcomes of hip and knee replacements worldwide
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader implications for international policy and healthcare systems beyond the UK, as well as potential interdisciplinary impacts, were explored more in the AI version. There was a stronger emphasis

on global adaptability and the future of prosthetic technology development.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Focus on the environmental impact of reducing metal-on-metal implants, and the long-term sustainability of ceramic prostheses.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version mentioned global applicability and potential for future regulatory frameworks to adopt these findings universally, including countries beyond the UK and US, which aligns with the global relevance dimension but was less focused on in the REF document.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Projections on evolving safety standards across orthopedic devices in response to similar research findings.

"
"70. Study Title : Reducing breast and ovarian cancer occurrences in women at high risk
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Relevance to developing nations with minimal cancer screening programs, indicating broader applicability in underserved areas.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version includes relevant but hypothetical expansions, such as the anticipated use of BOADICEA in broader genetic risk evaluations and its potential future scalability into mobile and global health applications.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on adaptability in preventive health frameworks globally and anticipation of expanded genomic applications, beyond breast and ovarian cancer, in genetic risk prediction.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Extended focus on the adaptability of BOADICEA for other hereditary cancers and broader application for genomic data integration within healthcare systems.

"
"71. Study Title : The Haydn Scale: Changing policy and practice for improving pupil behaviour in schools
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Some speculative discussions on future global applications, while relevant, extend beyond the current institutional impact focus of the REF submission.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI document focuses on potential international scalability and interdisciplinary relevance, which, while speculative, aligns with relevant expansion opportunities for the Haydn Scale's application.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded on the potential relevance of the Haydn Scale in international educational systems, beyond the initial UK focus.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Generalized references to broader policy implications without the specific institutional endorsements present in the REF submission.

"
"72. Study Title : ""Definitive demonstration of the adverse cardiovascular effects of air pollution leads to policy change at the local, national, and international level""
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applications like educational integration, global public health campaigns, and ethical considerations of air pollution effects on underserved populations are emphasized more in the AI version.
Rater 2 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version emphasizes the scalability of the research for broader health applications, demonstrating relevance for potential global air quality standards and wider environmental health policies.
Rater 3 Rating = 5 (Excellent)

RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version adds potential relevance to global standards and anticipates a broader, international uptake of air quality initiatives, which aligns with the REF's public health focus but is less region-specific.
Rater 4 Rating = 4: Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader contextual applications for emerging nations and predicted adoption pathways for global health organizations, which suggest future relevance beyond the UK.

"
"73. Study Title : Navigating Inclusion in International Peace Processes
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on real-time application of PA-X data for global and interdisciplinary use, supporting the adaptability of findings to varied global peace and conflict environments.
Rater 2 Rating = 5 – Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded potential of PSRP data as an academic resource for future research and training applications in international conflict and peace studies.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Highlighted cross-sector relevance in academic and policy settings, broader societal implications for public opinion on inclusivity in peacebuilding, and adaptive peace strategies for long-term applications.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional emphasis on applying gender-inclusive frameworks across diverse international contexts and conflicts, promoting adaptability in various negotiation settings.

"
"74. Study Title : Documenting and Protecting Survivors of Torture and Ill-Treatment Living in Poor Communities
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: - Potential for future cross-disciplinary relevance, suggesting integration of findings in areas like mental health and educational frameworks for human rights.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: None – the AI-generated impacts are highly aligned with the research'
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT extrapolates the study's relevance to potential global reforms, advocating for ethical standards in documentation, which implies a wider influence on international human rights discourse.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report provided broader scalability potential by suggesting applications of mobile technology and AI-supported tools as relevant solutions, though these were not specifically grounded in the original REF context.

"
"75. Study Title : Transforming genomic selection in commercial breeding programmes for pigs, dairy goats, and poultry
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Relevance in cross-disciplinary research contexts, emphasizing the broader appeal of genomic selection advancements in fields like human genetics and epidemiology.
Rater 2 Rating = Rating: 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI-generated content presents a broadened relevance to potential interdisciplinary applications in human genetic research and greater scalability possibilities, offering additional relevance to sectors addressing food security and sustainable agriculture.
Rater 3 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applications across other livestock industries, highlighting potential for increased efficiency globally, particularly in resource-constrained regions
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader relevance to

agricultural technology advancements, generalized application for environmental and
sustainability goals across livestock sectors.

"
"76. Study Title : Employing polymer physics to improve gluten-free bread structure
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report
suggests broader implications for sustainability within food manufacturing, particularly through
waste reduction and efficiency improvements, aligning with broader market trends in food science.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: General scalability
potential in polymer applications and economic benefits were emphasized in the AI-generated
content, underscoring broader industrial relevance, albeit less detailed regarding specific
industry partnerships.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional relevance
provided through potential collaborative ventures with other food technology sectors and
applicability to broader food stability issues.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applicability
of food physics research on texture and stability across other food sectors.

"
"77. Study Title : Peripheral Impressionisms: challenging perceptions of Impressionism
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
impacts emphasized relevance in terms of cross-disciplinary academic research implications, such
as art history and sociology, extending the focus beyond the arts sector to capture broader
societal impacts.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: A generalized
statement on the potential for increasing international interest and cross-border collaboration
in future curatorial practices.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Reinforcement of the
broader cultural impact on museum exhibitions and expanded discussions on art market influence
at a global level.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI content posits
potential institutional value shifts in curatorial approaches beyond Europe, foreseeing broader
adoption of the 'Peripheral Impressionism' theme in other cultural contexts, which REF did not
address.

"
"78. Study Title : Raising the profile of Scottish Literature through writing and consultancy
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI suggested
relevance through potential for influencing future national identity projects, which was not a
focal point in the REF submission but aligns with the research's extended social implications.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version
included hypothetical applications to curriculum enrichment and educational outreach, enhancing
the relevance dimension beyond the immediate scope of the REF submission, especially regarding
the engagement of younger audiences with Scottish literary heritage.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential
applications of similar strategies for cultural promotion in other regions with rich literary
heritage.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader relevance to
digital cultural preservation and potential for digital archives, suggesting a forward-looking
perspective on sustaining cultural impact in the digital era.

"
"79. Study Title : Secukinumab becomes the first interleukin-17A inhibitor approved for
psoriatic arthritis

Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT discusses the broader relevance of the IL-17A pathway, suggesting implications for public health programs focused on autoimmune conditions and offering potential expansion of secukinumab applications beyond PsA.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional discussion on potential uses of IL-17 inhibition in diseases beyond PsA, broadening its perceived relevance to immune-based therapies.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Relevance to broader rheumatology and immunology guidelines, and application to global health implications beyond the European and North American context.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: General applicability to other immune-mediated diseases, relevance in broader clinical contexts for patient autonomy, especially through novel administration methods (e.g., autoinjector).

"
"80. Study Title : Establishing the Facts, Developing Professionalisation and Enabling Transparent 'Pilgrim-centred' Communication in the UK Hajj Sector
Rater 1 Rating = 4 - Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT content included broader relevance, such as applications to the Umrah sector and other international pilgrimage frameworks. AI discussed potential frameworks for ethical and transparent governance that could extend to global religious tourism sectors, projecting relevance beyond the REF's immediate impact.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Hypothesized relevance to the EU's potential regulatory interest in pilgrimage practices and suggested frameworks for similar industries.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on the potential benefits of fraud prevention frameworks for global religious tourism sectors beyond the Hajj industry, highlighting the relevance of sector-specific impacts on broader cultural and economic domains.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Discussion on cross-sectoral relevance of governance and consumer transparency models, particularly relevant in the context of expanding the reach of the professionalization model across other faith-based pilgrimage sectors.

"
"81. Study Title : A Bridge for Spies: Overcoming the Practitioner-Academic Gap in Intelligence and Security
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version included potential applications across global security agencies and highlighted the broader societal impacts of enhanced security protocols, which were not the focus in the REF submission.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded consideration of public perception and potential community-level impacts from improved intelligence practices that indirectly support societal welfare and ethical considerations in intelligence.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT's output suggests expanded relevance, proposing that the study's principles could inform other public sectors beyond security, like education or public health, which are not covered in the REF submission.
Rater 4 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader relevance of the academic collaboration model beyond national security, indicating potential adaptations for other high-stakes policy domains.

"
"82. Study Title : Influencing Labour Standards and Stakeholder Action Through International,

European and National Law and Policy
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
content introduces broader potential relevance across other EU labor law contexts, considering
how similar countries undergoing economic reforms might implement comparable labor protections.
It further suggests an educational relevance for informing curricula on labor law and social
justice, a forward-looking dimension beyond the original scope of the REF report.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT mentions
implications for EU-wide labor policies and a broader spectrum of economic repercussions,
aligning with a larger, multi-national perspective that resonates with the project's objectives.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional relevance
extended toward application to industries affected by precarious work structures, especially in
response to crises in economic sectors outside the EU.
Rater 4 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader international
policy relevancy and potential adaptability to different socio-political contexts globally.

"
"83. Study Title : Creating Value and Transforming Lives through Arts and Creative Media Practice
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI assessment
discusses broad relevance in urban planning, encouraging adaptable models that can address
heritage preservation globally, which, while valuable, broadens beyond the immediate aims of the
REF submission.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI includes a general
mention of cross-disciplinary relevance, enhancing the research's broader societal applicability.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader, less
region-specific adaptability, focusing on transferable models for community-driven projects
applicable across urban contexts globally.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applicability
to urban areas experiencing economic disenfranchisement, highlighting global use-cases for the
developed frameworks.

"
"84. Study Title : A Transformation in Creep Condition Monitoring for High Temperature, High
Pressure Components
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional relevance
in highlighting the potential integration of welding optimization in sectors beyond those
specified, particularly renewable energy and sustainable infrastructure development (e.g., wind
turbines, lightweight vehicle manufacturing).
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential
international collaborations and interest from high-stakes industries like nuclear energy and
aerospace beyond South Africa.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expanded potential
applications beyond South Africa, suggesting the use of WeldCore in various industrial sectors
internationally.
Rater 4 Rating = 4
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Relevance of WeldCore
technology to additional industries in different international regions, which may align with
similar operational challenges.

"
"85. Study Title : The creation (and re-creation) of contemporary female heroines at the center
of new plays for the theatre.
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader implications
of gender equity on a global scale within the arts sector, extending the relevance of the
findings to regions and industries beyond the theatre sector.

Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional emphasis
on the potential for this research to serve as a model for gender equity in the performing arts
sector, which aligns with the overarching project aims but was not a focus in the REF
documentation.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI provided a broader
view on the potential for cross-cultural collaborations and influence on international media,
extending the perceived relevance of Harris's works beyond immediate theatrical settings.
Rater 4 Rating = [5 - Excellent]
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader suggestions
on Harris's potential impact on gender representation discussions in international theatrical
and cultural policy contexts.

"

"86. Study Title : Changes to cervical screening policies following the rollout of human
papillomavirus (HPV) vaccination
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The ChatGPT version
includes "global scalability" impacts, reinforcing the relevance of the research to
international health frameworks.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
includes relevance to low-resource settings, suggesting applications of the policy model for
broader population health gains, which adds practical pathways beyond those defined in the REF
submission.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
impacts emphasized additional outreach and public education aspects, which complement the
research goals and broaden its contextual relevance.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Expansion of
relevance to include impacts on health systems in non-UK settings, suggesting global
adaptability and influence of the project's findings.

"

"87. Study Title : Combating Crop Losses and Improving Global Food Supplies through Mathematical
Modelling of "Gene Silencing"
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
highlighted the potential for collaboration with global organizations, underscoring an
international perspective on sustainability that could support wider adoption across diverse
agricultural settings. It also mentioned long-term impact projections for biostimulant use,
which could drive future policy reforms globally.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential for the
biostimulants' application in organic and climate-resilient farming on a global scale was
highlighted, expanding the relevance of the research for international sustainable agriculture.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Relevance to future
agricultural policy and biofuel industry adaptation
Rater 4 Rating = 4
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Contextual relevance
to similar agricultural practices globally and the potential applicability of the findings in
international policy discussions on pest control and food security.

"

"88. Study Title : Emerging Media, Learning, and Organisational Practice – Driving Change in
Tourism and Education in Northern Ireland
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader reference to
the global significance of using AR in educational and tourism contexts, potentially influencing
similar regions outside Northern Ireland.
Rater 2 Rating = 4 - Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader application
possibilities for educational and tourism technology in global contexts, non-specific references

to cross-sectoral impacts like urban planning.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on
scalability and adaptability of these media practices for global use, stressing cross-cultural
applications.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on scalable
potential of the AR technology in international heritage sites beyond NI, suggesting potential
for AR's impact on diverse tourism models and educational settings globally.

"
"89. Study Title : Global adoption of the Dermatology Life Quality Index (DLQI) into clinical
practice
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential for
healthcare cost savings: The ChatGPT version links DLQI use with potential economic impacts,
proposing it could improve healthcare efficiency by reducing unnecessary treatments and expenses
for dermatological care.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Consideration of DLQI
as a foundational tool for future expansion into broader healthcare quality assessments,
potentially increasing patient engagement across diverse health conditions.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI version
includes potential future relevance for DLQI in non-dermatological patient-centered care
approaches, such as in primary care and chronic disease management.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Future expansion into
patient-centered digital platforms and broader use in quality-of-life measurement beyond
dermatology.

"
"90. Study Title : Improving the healthcare experiences of children and young people
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
content proposed relevance across public health frameworks, indicating potential cross-sector
impact through public awareness campaigns and social media initiatives to inform caregivers and
healthcare professionals about child-centered care. This expanded the potential pathways for
societal engagement and relevance of the research impacts.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: General applicability
in different healthcare settings outside the NHS and potential for adaptation in global contexts.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential for
adapting child-centered healthcare protocols internationally, indicating broader relevance
beyond the original geographic context.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
content offers a relevant perspective on international scalability, recognizing the adaptability
of these pediatric care strategies for various cultural contexts and healthcare systems
globally, which is not explicitly stated in the REF submission.

"
"91. Study Title : The value of the Carers' Alert Thermometer (CAT) in identifying family
carers' needs and supporting them in their caring role
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT addresses
CAT's potential global relevance and implications for widespread adoption, including
hypothetical cross-country adaptability, suggesting relevance for broader contexts. This
relevance, while aligned with the theme, is anticipatory and not focused on the current
institutional reach highlighted urn the REF submission.
Rater 2 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1. Relevance of CAT
as a tool for enhancing carer support in global healthcare systems. 2. Potential application
within social welfare policy and mental health frameworks.
Rater 3 Rating = 5 (Excellent)

RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT introduces the CAT's potential for integration with digital tools for remote monitoring, highlighting an additional relevant application path for expanding carer support accessibility.
Rater 4 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broad implications for healthcare policy outside the UK, especially in resource-constrained settings where scalable models like CAT can be impactful.

"
"92. Study Title : God-complexity and the Multiple God-Aspects Framework
Rater 1 Rating = 4 - Very Good
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Added emphasis on the potential for global and cross-cultural adaptation of the model, including its relevance in diverse spiritual and psychological settings beyond the specific populations discussed in the REF submission.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Consideration of potential policy advocacy and integration with wider public health discussions on religious and spiritual well-being, an extension that remains aligned but more expansive than the specific application contexts discussed in the REF submission.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on future integration with psychological well-being measures and educational outreach for fostering inclusive mental health frameworks.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader adaptability for diverse religious communities, hypothesizing on multi-disciplinary collaborations that extend the relevance into future domains.

"
"93. Study Title : Abertay Game Lab: play, performance, and public engagement with games
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Connections to broader educational impacts, as well as potential influences on international museum practices, particularly in the context of inclusivity and audience engagement strategies for non-gaming audiences.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader interpretation of public engagement objectives with the potential to extend to other digital arts fields and broader technological applications.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT explored broader implications of these initiatives on international public awareness, considering how digital culture and interactive exhibitions might impact future audiences and policy in creative arts.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on the scalability of gaming engagement models across various art disciplines, adding relevance through potentially broader application areas.

"
"94. Study Title : Improving Care for Patients with Chronic and Distressing Tinnitus through Mindfulness Based Interventions
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI expanded on training and certification potential for healthcare providers, aligning with capacity-building relevance by ensuring a skilled workforce, which supports ongoing MBCT integration across clinical settings.
Rater 2 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional potential relevance to adjacent mental health conditions and broader healthcare systems, discussed within the AI text but not directly covered in REF submission.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Relevance to interdisciplinary fields like audiology and mental health, long-term potential to support digital healthcare solutions, and broader relevance to global health disparities and underserved

populations.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Prospects of MBCT-t's relevance in global healthcare and broader adoption, particularly for conditions with similar symptoms like chronic pain, expanding the scope of relevance beyond the initial project's focus.

"
"95. Study Title : Developing and Embedding Effective Careers Guidance for Young People in England
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional emphasis on potential long-term contributions to educational resilience and adaptation in career guidance practices.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated impacts extend relevance by considering adaptive technologies and hinting at additional fields like mental health, which aligns with career guidance's broad societal role but is slightly beyond the REF submission's immediate scope.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader mention of applicability across educational systems outside the UK, demonstrating high relevance to international contexts, especially in countries looking to reform career education in schools.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: AI's relevance extended to the potential adaptability of career guidance frameworks to other educational systems, suggesting broader applications across different schooling contexts.

"
"96. Study Title : Design meets disability: changing the relationship between disability and design in business, culture, practice, and education
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT extrapolates future relevance, including adaptation of inclusive principles into mainstream design education and cross-cultural contexts in design practice, which aligns with growing global advocacy for inclusivity.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: 1. Noted potential for educational impact in design programs, extending inclusivity principles to future designers. 2. Relevance for international policy adaptation across various societal and industry-specific regulatory frameworks.
Rater 3 Rating = 4 (Very Good)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT version added a broader discussion on how design-inclusive principles could serve as models for other societal and industry contexts, suggesting broader implications.
Rater 4 Rating = 4
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Additional perspectives on how inclusive design could expand across other sectors, implying that the project's impact has transferable value beyond the immediate scope.

"
"97. Study Title : Digital Archiving for Curation and Dissemination
Rater 1 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT expands on usability in educational curricula, suggesting additional applications in arts education, public history, and community awareness initiatives.
Rater 2 Rating = 3
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Potential impacts on general technological advances in digital preservation
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Enhanced focus on the use of digital methodologies as a template for international projects, highlighting broader implications for digital curation across cultural and academic institutions globally.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader relevance discussions on the role of digital archives in democratizing access to historical records beyond traditional institutions.

"
"98. Study Title : Prevention and management of head injuries in cricket and rugby union
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Long-term
applicability of findings in emerging sports technology and wearable safety devices for sports
beyond cricket and rugby, such as wearable headgear monitoring systems.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT's reference
to technology transferability to other industries, such as construction or public health,
slightly broadens the potential relevance beyond the core sports domain, aligning with broader
impact possibilities.
Rater 3 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Suggested relevance
for general sports safety; wider implications for the adoption of standardized concussion
protocols across international sports.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: ChatGPT additionally
addressed the potential to integrate findings into concussion management across amateur sports
leagues and non-athletic domains, ensuring broader relevance beyond the targeted professional
sports levels.

"
"99. Study Title : The Kindertransport 1938/1939 to the UK: History Informing the Future
Rater 1 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI-generated
content expands the relevance by suggesting that the research findings could serve as a model
for developing humanitarian policies globally, which adds an international scope not as
emphasized in the REF submission.
Rater 2 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The potential
relevance to international refugee frameworks, emphasizing global refugee policy implications
beyond the immediate UK context.
Rater 3 Rating = 5 - Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on
cross-disciplinary applications for trauma-informed practices.
Rater 4 Rating = 5
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: The AI report extends
relevance to contemporary global applications, particularly with regard to community-oriented
refugee aid, making it broadly applicable to current social policies.

"
"100. Study Title : An evidence-based approach reduces the local costs of biodiversity
conservation in low- and middle-income countries
Rater 1 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader relevance
projected for implementing biodiversity offset standards globally, with suggestions on the need
for ethical frameworks for local communities in varied biodiversity-rich, low-income countries
beyond Madagascar.
Rater 2 Rating = 5: Excellent
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Broader applicability
to other low-income, biodiversity-rich countries beyond Madagascar, suggesting the potential for
a wider impact on conservation strategies at a global level.
Rater 3 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Emphasis on potential
international influence beyond Africa, including the applicability of findings to other
low-income countries facing similar conservation-development challenges.
Rater 4 Rating = 5 (Excellent)
RR Related Aspects Mentioned in ChatGPT Version but not in REF Submission: Enhanced relevance by
projecting future policy adaptations globally, especially in regions where social and economic
aspects of conservation lag behind environmental priorities.
